AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

December 31, 2002

Sir:

The following amendments and remarks are respectfully submitted in connection with the above-identified application in connection with the accompanying RCE and is responsive to the Advisory Action dated December 24, 2002.

IN THE CLAIMS:

Please amend claim 1 as follows:

1. (thrice amended) A method of treating a surface of a sample, comprising the steps of:
- generating a plasma in a treatment chamber;
 - applying an rf bias voltage of a frequency so that ions of intermediate energy which promote etching reaction while providing poor directionality are reduced, and ions of high energy having a high directionality and ions of low energy which do not contribute to etching are increased, so as to have at least one peak point at a region of high ion energy and at least one peak point at a region of low ion energy for anisotropic etching, and the rf bias voltage to which a peak to peak voltage V_{pp}
